## The Hut Platform,

### Regulated environment for Primary Industries

The Hut is a regulated platform with Aggregation software designed to communicate between primary providers, trades and markets. Its ability to search and secure new markets, manage trades and distribution, enables custodians and Primary industries to maintain more control over their commodities, materials and produce.

#### How Individual parties leverage The Hut

- Primary Providers: Leveraging their dedicated account manager, Our custodians gain quick access to regulated trades, resources, supplies and reach to new markets.
- Trades and Resources: All registered trades are regulated, providing confidence to our primary providers. Dispatch of jobs is measured and based on experience, abilities and region. Our trades enjoy the simplicity and back end management provided by the platform and its team.
- Markets: General consumers and wholesale markets register to reach New Zealand primary produce, commodities and materials directly from the land, known as Farm Gate to Door.
